### Did You Know?

Did you know how important it is to read to your children even at this age? Here's why: Reading aloud to children has many benefits. It exposes children to texts that they might not find on their own, therefore improving their vocabulary and comprehension. Additionally, reading aloud increases reading fluency. During the read aloud the listener hears how the reader's voice can be used to create and extend meaning. Besides all of that, it is just plain and simply

cozy, enjoyable and a great way to bond with your children! (Timothy Rasinski 2003)

Please keep reviewing basic math facts with your child. It is much easier for them to build on the skills.
